## Plant Physiology Research Methods

By B. Politycka, C.L. Goswami, S.S. Narwal

Scientific Publishers, 2007. Hardcover. Book Condition: New.

This book 28 Chapters, is divided into 7 Sections. Section I. Seed Physiology, includes 5 chapters describing the structure of seed, optimum conditions for seed germination, physiological and biochemical changes at cellular level. Section II. Growth and Development, describes leaf area, growth indices, senescence and abscission. Allelochemicals, present in soil or plant, can create chemical stress which may change the plant water status, plasma membrane properties, chlorophyll stability and waxes present on the organ surface. Methods to determine all these parameters are described in next 4 chapters in Section III. Stress Physiology. These sites can be explored by estimating chlorophyll content, chlorophyll fluorescence, photo-systems I and II activity, carbon dioxide exchange rate, activity of CO<sub>2</sub> fixing enzymes, intermediate metabolite level, photosynthate partitioning, respiration and finally the crop growth dynamics. Methods to determine extent of all these sites are explained in 7 chapters in Section IV. Gas Exchange Processes. The main cause of changed physiological process is at the gene level, for which estimation of nucleic acids is very critical. It is briefly explained in section V. Biochemical Estimation. Section VI. Microtomy and Histochemistry, has 7 chapters. Basic procedure to process the test plant...

### Reviews

*Without doubt, this is actually the greatest work by any writer. It is actually written in simple terms instead of confusing. I found out this ebook from my i and dad recommended this pdf to understand.*

-- **Kristy Dicki**

*Most of these publication is the ideal ebook readily available. it was actually written very flawlessly and beneficial. I discovered this book from my i and dad suggested this book to find out.*

-- **Prof. Lavern Brakus**
